## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see pages 7-8, filed 9 March 2007, with respect to claims 1-19 have been fully considered and are persuasive. The rejections under 35 USC § 112 of claims 1-19 has been withdrawn.
2. The following rejections are deemed proper.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation " $0 \leq k_2 \leq 1$ " in line 2. There is insufficient antecedent basis for this limitation in the claim. Claim 1 from which claim 3 depends from clearly states " $0 \leq k_2$ ", therefore " $k_2$ " cannot be " $k_2 \leq 1$ ."

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 17 rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for compounds wherein  $k_2$  is no "0", does not reasonably provide

enablement for compounds of claim 1 wherein  $k_2$  is 0. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Applicant clearly states the instant compounds of claim 1 can be made by the process of claim 17 except when  $k_2 = 0$ . As presently written, compounds wherein  $k_2 = 0$  is encompassed in the process of claim 17 thereby not being enabled by the specification.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-13, 18-19 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5, 7-9, 12-13 of

copending Application No. 10/508,704. Although the conflicting claims are not identical, they are not patentably distinct from each other because both read on phospholipid compounds.

In 10/508,704, there is no integer or range for "m" and it is defined to depend upon how much of the oxyalkylene group was added. Therefore "m" can read on "0" and the ratio given for "m" states it can read on "0" ( $3 \leq m \leq 200$ ), based on these facts, the instant invention reads on the instant compounds.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Allowable Subject Matter***

9. Claims 15-16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
